Springhill Farms Ltd,

Salters Lane,

Lower Moor,

Pershore,

Worcs,

WR10 2PE

Accommodation available on request

Farming over 4,500 acres supplying almost a fifth of the total UK market for tomatoes, 52 weeks of the year, as well as being the second largest grower of spring onions in the UK. We generate the equivalent renewable electricity of powering 6000 homes per year. From both of our plants and virtual pipeline, we injected over 120 million kWh of biogas into the grid, making us one of the largest producers of bio-methane nationally.
