

WE ARE LOOKING FOR

agrosience services

UK Field Trials Students

Worcestershire/Gloucestershire

May – September 2026

(Dates can be flexible depending on the candidate)

Eurofins Agrosience Services provides analytical, regulatory and field support to the crop protection industry. Our UK technical activities involve conducting field studies on/in agricultural crops to determine the safety and efficacy of new agrochemicals and crop varieties.

We have availability to take on an assistant working three to four days a week to fit around their existing studies/activities between May and September 2026, working alongside an experienced trial officer at our remote base covering Worcestershire/ Gloucestershire and the southwest.

Typical trials work conducted from this base includes Ag-chemical trials on combinable crops (Namely fungicide), Top fruit trials, forage and grassland trials, variety plots and trials on potatoes. You will assist in the checking, preparation and calibration of equipment and take part in the application and assessment of crops.

Requirements

- Have a flexible approach to working outside of normal office hours depending on workload.
- Enjoy working as part of a team

We offer:

- Competitive salary
- Comprehensive In-house training
- Opportunity to develop your skills and abilities

It is essential that you hold a full current driving licence.

Please send your CV and a covering letter by Email to:

charlotte.yates@as.eurofinseu.com

Telephone: 01332 864800

Please state in your letter your available dates.

Closing date for applications: 30th April 2026
