

Sustainable Agriculture Manager

Location: Midlands

Role: Permanent

Sector: Livestock

The Opportunity: This is a brand new and rewarding opportunity to manage & drive the client's long-term sustainability project to achieve a carbon neutral status across its operations. This role offers significant responsibility to a data driven, science led individual with agricultural expertise. The opportunity will require a character who can confidently take control of measuring and monitoring actions and processes throughout the business to ensure that core milestones are achieved. Collaborating with a multitude of internal and external stakeholders, the perfect candidate will have a passion for sustainability within the sector and the ability to influence stakeholders at all levels.

Employer: A privately-owned, dynamic livestock supply chain with a forward thinking and ambitious plan to achieve sustainability objectives whilst delivering on the consistency & quality demanded by its customers.

Skills/Experience Required:

Essential

- Experience of developing and encouraging sustainability
- A good knowledge of livestock farming processes & systems
- A strong interest in soil health, animal health & welfare & sustainability of the agricultural sector
- Excellent relationship building, influencing & communication skills
- Strong decision making skills, the ability to prioritise and make action plans
- Driven to achieve results
- Degree in Agriculture or agronomy (postgraduate qualification advantageous)

Remuneration: A significant package available for the right candidate
