

# Work Opportunity

## Soil Samplers

The Farm Carbon Toolkit is seeking individuals with an interest in soil management to undertake on-farm sampling. This is a paid work opportunity that involves visiting farms, taking soil samples and undertaking some in-field soil assessment.

This is a practical and highly physical role that takes place outdoors.

We expect applicants to have an appreciation and interest in agriculture and an enthusiasm for soils that enables them to build trust and rapport with farmers.

Own vehicle required. We will provide necessary training on soil sampling, together with ongoing support as required.

If you are interested, please visit our website for more information and contact Samuel Smith: [info@farmcarbontoolkit.org.uk](mailto:info@farmcarbontoolkit.org.uk)
