

Job Description

Job Title	Data Analyst	Employee Name	
Reporting to	Head of Technology	Responsible For	N/A
Location	Honingham Thorpe, Colton, and any other reasonable locations as required		

Overview of Role

The Data we hold is our largest asset, and we want to ensure we are proactively analysing our data with the aim of producing useful insights which can help us to plan and negotiate and to provide useful insights to our Members which they can use to inform key business decisions.

We are looking for someone with strong data analysis skills to support us with a data experiment, looking at how we can make use of our own data, third party data sources and machine learning technology to do predictive purchasing analysis. The placement will involve working with internal and external stakeholders to determine whether this type of analysis is feasible, cost effective, accurate and able to provide added value to our members.
