

Field Technician

Due to the success and rapid growth of the Omnia TerraMap service, we are seeking a number of Scanner Operators across the UK. Working in the field alongside our agronomy teams, you will carry out the raw data scans and soil sampling used to produce nutrient and texture maps for farmers. This is an initial fixed contract until the end of November, with the possibility of an ongoing full-time position.

The Role:

- In-field mapping of UK agricultural soils using specialist equipment.
- Maintaining good contact with farmers prior, during and after the service has been carried out.
- Maintain regular contact with the logistics team.
- To keep online tracking documentation up to date and accurate.
- Properly maintain and use equipment provided.
- Overnight stays highly likely.

The Person:

- You must have a clean full UK Driving licence.
- You must be self-motivated with the ability to work alone.
- Innovative problem solver.
- Strong IT skills.
- Excellent communication and customer service skills.
- Attention to detail whilst working under pressure.
- Able to meet deadlines.
- Agricultural experience desirable.

Contract length: Initial contract 5-6 months

Full time hours: 40 hours per week

Job types: Full-time, Temporary, Contract

Salary: £10.00-£11.00 per hour

COVID-19 considerations: Covid Safe Working environment with all workplace risk assessments and Covid Safe measures in place.
