

One-stop service - world-class, worldwide

Industrial placement - UK field trials student

Eurofins Agroscience Services provides analytical, regulatory and field support to the crop protection industry. Our UK technical activities involve conducting field studies on/in agricultural crops to determine the safety and efficacy of new agrochemicals and crop varieties.

The UK field teams have a number of industrial placements available, actively taking part in field trials.

We have vacancies at the following locations for 6 and 12 month placements starting in Spring/Summer 2025

Offices

EAS Wilson (HQ), Wilson, Derbyshire

EAS Yorkshire, Malton, Yorkshire

EAS S East, Stowmarket, Suffolk

EAS N West, Ormskirk, Lancashire

One-stop service - world-class, worldwide

Successful candidates will spend time working outdoors with experienced agronomists, developing their experience in crop protection, field trials and general agronomy.

- You will assist in all necessary checking, preparation and calibration of equipment, vehicles, chemicals and other materials and actively take part in the application of pesticides to a variety of crops
- You will also be involved in the assessment of crops, weeds, pests, diseases and assist in collecting, gathering and storing suitable specimens for residue analysis

There may be opportunities to spend time with our Agricultural Machinery Team, Operational Exposure (OPEX) Team, Seeds Business, Chemical Store, Molecular Diagnostics Laboratory (ASMD) and Study Management departments throughout your placement.

Requirements

- Undergoing education to a degree level, or equivalent, in Applied Biology, Environmental Studies, Agriculture, Horticulture or relevant Life Science subject
- You will need to have a flexible approach to working outside normal office hours depending on workload
- Enjoy working as part of a team

It is essential that you hold a full current driving licence.

We offer:

- Competitive salary
- Comprehensive in-house training
- Opportunity to develop your skills and abilities

Our placement students have the opportunity to apply for our Graduate Recruitment Programme

Future employers value relevant work experience, so why not contact us today?
